Language skills

English

Proficient

Teaching activity

In the past I have been involved in several courses for the undergraduate/graduate degrees in Computer Science, including Network Protocols, Network Applications 1 and 2, Social and Peer-to-Peer Networks. Currently I teach Web Application Development for the third year students in Computer Science and Computer Engineering, and Graph Analytics for the MSc students in Computer Science. I also collaborate to the Agile Development of Smart Systems course, for the same MSc degree.

Research interests

My research interests are on web technologies, with an emphasis on services and applications for citizens and students. In the past, I have been involved in research activities on e-learning, with a special emphasis on accessibility issues for users with special needs, open data and smart disclosure.
