Education and training

M.Sc. Physics

Non-linear electron spin resonance for the molecular dynamics of bipolar lipids - 110/110 cum laude

University of Genova - Genova - IT

Ph.D. Biotechnology

Metformin inhibits cell cycle entry of B-cell chronic lymphocytic leukemia cells.

University of Genova - Genova - IT

Academic experience

2017 - ONGOING

Assistant Professor (RTDB)

University of Genoa - Genova - IT

Research interests

My main research activity focuses on the elucidation of cell death and cell proliferation mechanisms, with particular regard to hematologic malignancies. More recently, I focused on targeting cellular energetic metabolism in chronic lymphocytic leukemia.
