Research interests

Lorenzo Simoni's main interests are non-financial disclosure, business model, intellectual capital, performance measurement and reporting, sustainability reporting, risk reporting, and business crisis. His research projects focus on business model disclosure in the annual report and its effects, on the links between business model and non-financial indicators, business model and intellectual capital and business model and risks. He has also conducted research on sustainability reporting. Recently, his research interests have expanded into the fields of business crisis and earnings quality.
