Education and training

1992

Philosophy Doctorate

Oncogenes and Growth Factors in Bone Tumors - na
University La Sapienza - Rome - IT

1989

Surgical trainee in Orthopaedics and Trauma Surgery

The role of oncogenes in bone tumors - 70/70
Medical School University of Torino - Torino - IT

1983

Medical Doctor

The role of Rous Sarcoma Virus in the transformation of chicken embryo
fibroblasts - 110/110 cum laude
University of Torino Medical School - Torino - IT

Academic experience

2017 - ONGOING

Associate Professor in Orthopaedics

University Of Genoa Medical School - Genoa - IT
Responsible for Orthopaedic Oncology Unit in the Orthopaedic Division

Language skills

English

Proficient
TOEFL

Research interests

My actual research interest is devoted to the mechanisms of bone metastasis from solid tumors, the metastatic niche formation and the escape from the immune control in the bone microenvironment. I am interested as well in the progression of regenerative medicine in the orthopaedic field. Especially in cartilage, bone and tendon regeneration and repair using mesenchymal stem cells and biological and/or biocompatible scaffolds.
