☎ +39 0103536033

Education and training

1999

Ph D in Chemistry for Engineering

Development of experimental methods for the study of organic coatings for the protection of reinforced concrete and steel

University of Genova - Genova - IT

Academic experience

2000 - 2002

Post doctoral fellow

University of Genova - Genova - IT

Language skills

Italian

Mother tongue

English

Independent

Research interests

Study and characterisation of organic coatings:

- Organic coatings for steel protection
- Organic coatings for the protection of concrete, reinforced concrete and cementitious substrates
- Organic coatings for special uses: intumescent coatings, antifouling coatings, fillers for naval applications

Study and characterisation of passivable alloys:

- Al alloys
- Stainless steels
