Education and training

2013

PhD in Philosophy

University of Genoa

Academic experience

2015 - 2018

Researcher - general Psychology

University of Genoa

Language skills

English

Proficient

Research interests

I study how human **mind** processes verbal **language**. In order to do so, I combine linguistic theory with experimental methods. Some of my research interests concern presuppositions, polar questions, theory of reference, metaphors, gender bias and multimodal communication and the neuropsychological components involved in pragmatic processing.
